

Worry, why so worried? We are a million strong standing to defend the First Amendment giving us the rights to Free Speech and the right to assemble. What is wrong?

That is what's wrong. Aren't they guaranteed by the Constitution?

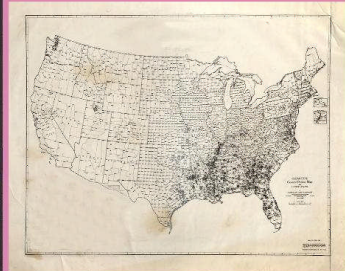

Yes, but the Constitution FOR the United States was replaced by the Constitution OF the United States. The original Constitution was a legal document written by the States giving the Federal Government

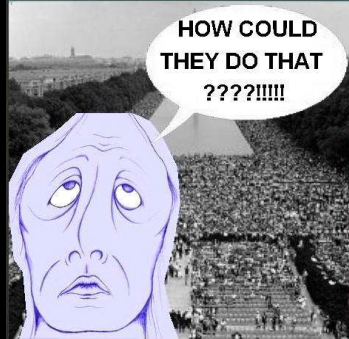

specific jobs of creating money, collecting taxes, defense and General Welfare like creating roads and post offices and regulating trade and immigration. The new Constitution is a business document for the company called

D-U-N-S® Number: 16-190-6193
 Company Name: Government Of The United States
 Also Known As: U S Government
 Mail Address: The U S Capitol Washington, DC, USA 20515-0001
 Executives: Barack H Obama - President Mr Joseph R Biden - Vice President

the UNITED STATES. Since the 41st Congress passed the Act of 1871 allowing the District of Columbia to be run by the UNITED STATES CORPORATION owned by International Bankers. The Republic

which was the form of government established by the Founding Fathers, has been taken over by this corporation owned by International Bankers like a cancer.

HOW COULD THEY DO THAT ????!!!!!

By changing Common Law based upon common sense and focused on protecting the individual to Maritime Law designed to protect an ocean going vessel. With Maritime Law the Ship of State (corporation) is what is being protected.

What about Congress, the White House, Supreme Court?

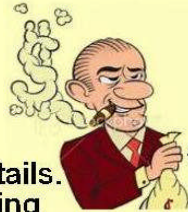

They all work for the corporation. All Federal Employees work for the corporation. Obama is listed as its Chief Executive. And Americans do not know they all belong to the corporation called the UNITED STATES.

In 1871 the nation was financially crippled by the Civil War. International Bankers said they would give a loan based upon creation of UNITED STATES CORP. and using the American people as collateral.

→ COUNTY → STATE → DEPARTMENT OF COMMERCE Washington, D.C.

International Monetary Fund (IMF) Brussels, Belgium

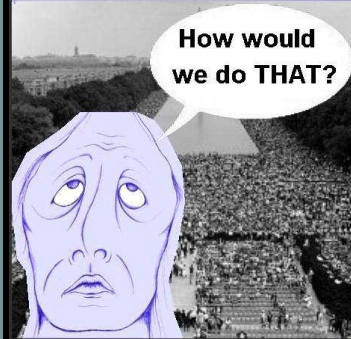

It took awhile to work out the details. But eventually they started issuing birth certificates to maintain a list of collateral assets of the corporation. That is why every single legal document you own shows your name in capitals, required by law as it refers to a business entity. In Maritime Law you are considered a slave and your worth is on how many taxes you will pay to the corporation. The number on the birth certificate registers the new child in a trust. A Social Security Number is used to track that asset.

Oh my... this is very scary!

Don't worry, Worry. A dark room is scary until you turn on the light. We are the light. We only have to fire them.

How would we do THAT?

By protesting and spreading knowledge. Force Congress to awaken. Repeal the Act of 1871, disband the corporation, free Federal Courts to operate under Common Law. Reinststate the Republic and her Constitution.

Oh I don't know about that! wouldn't the economy and everything be destroyed?

Destroyed no. Changed yes. The real power behind the corporation is the Federal Reserve Banking System. The FED manipulates the economy by controlling how easy it is to get a loan. Yet the FED is a private corporation with essential no government oversight.

Dismantle the FED System and expand Public Banking concepts.

The Banking System is only buildings, files, people and philosophy. Change the philosophy from greed to fairness.

FED SYSTEM INCLUDING INTERNATIONAL FINANCE SYSTEM

147 SUPER CORPORATIONS

1,318 CORPORATIONS

But honestly, is this something I should even want to do? Things could be worse. I just don't know...

Oh things will get worse unless we stand up and stop it! It will not be easy but it must be done. It has started in the streets and hopefully will fuel the courage and power of Congress to make changes in the law, to take us back to the Republic.

The 99% must take a stand and demand a return of the Republic.

TOGETHER WE CAN DO THIS!

Don't worry, Worry. We have each other's backs...

100 PEOPLE IN A ROOM with \$100 between them:

1 would have \$45

1 would have \$11

98 would split \$44

IN TODAY'S ECONOMY.
